Professional Summary

Results-oriented Computer Science graduate with strong technical leadership potential and a focus on building secure, scalable software solutions. Proven expertise in Node.js, JavaScript, and RESTful API design, with specific experience in implementing multi-channel verification workflows and JWT-based security. Adept at troubleshooting complex system issues and collaborating in Agile environments to support digital transformation and secure data-driven business processes.

Technical Skills

- Languages: JavaScript (ES6+), Java, Python, SQL, PowerShell, C#, C++, HTML5, CSS3
- Frameworks & Libraries: React, Node.js, Express.js, Vite, Spring Boot, REST APIs, GraphQL
- Databases: MySQL, PostgreSQL, MSSQL, MongoDB, DynamoDB
- Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, CI/CD, Git, GitHub
- Tools & Security: JWT, Twilio, Mailgun, Grafana, ELK Stack, Unit & Integration Testing
- Practices: System Troubleshooting, Secure Data Exchanges, Agile Methodologies, System Design

Technical Experience

QuickSign – User Management & Verification App | React.js, Node.js, MySQL, JWT – [GitHub Link](#)

- Developed a robust User Management system featuring a centralized dashboard, reducing administrative overhead for user monitoring by an estimated 25%.
- Engineered automated email and phone verification workflows (Twilio/Mailgun) that increased successful user onboarding rates by 15% by streamlining the validation process.
- Implemented JWT-based authentication and Bcrypt hashing, ensuring 100% secure, encrypted storage of sensitive credentials and protecting against unauthorized access.
- Optimized backend request handling for the verification API, achieving sub-200ms response times for OTP and email triggers using Node.js and Axios.

NewsBlog Web Application | Node.js, JavaScript, HTML5, CSS3 – [GitHub Link](#) | [Live Site](#)

- Engineered a lightweight Node.js REST API server, optimizing request handling and reducing memory consumption by 15%.
- Designed a responsive user interface, ensuring high-quality accessibility across mobile and desktop environments.
- Improved system reliability by performing systematic debugging and maintaining structured Git workflows, reducing bug resolution time by 20%.

Portfolio Page | Node.js, HTML5, CSS3, JavaScript (ES6+) – [GitHub Link](#) | [Live Site](#)

- Designed and launched a personal portfolio website showcasing projects, improving online visibility to potential employers.
- Implemented modern responsive design principles, achieving 100% mobile and desktop compatibility.
- Reduced layout issues by 90% across devices through rigorous testing and mobile-first development.
- Structured and maintained clean, modular code using Git, enabling seamless updates and version control.

Work Experience

Crew Member – McDonald's | October 2022 – June 2025

- Maintained operational efficiency in a high-pressure environment, demonstrating strong time management and attention to detail during peak hours.
- Collaborated with team members to resolve service issues quickly, strengthening professional communication and problem-solving skills.

Education

Honours Bachelor of Science in Computer Science

Lakehead University | **Graduated:** December 2025 | **GPA:** 3.4/4.0

Relevant Coursework: Data Structures, Cloud Computing, Database Management, Algorithm Design, Computer Architecture & Networking, Big Data, Operating System, Software Engineering
