Summary

Computer Science graduate with strong technical leadership potential specializing in backend and full-stack software development with hands-on experience building scalable applications using Java, Spring Boot, Node.js, SQL and JavaScript. Proven ability to design RESTful APIs, analyze system performance, and optimize database queries through data-driven engineering projects. Experienced with AWS, Docker, CI/CD workflows, and modern DevOps practices. Strong analytical thinking, problem-solving, and documentation skills with the ability to communicate technical concepts clearly and collaborate effectively within cross-functional teams. Demonstrated initiative, adaptability, and project planning abilities while delivering reliable and efficient software solutions.

Education

Honours Bachelor of Science in **Computer Science** – Lakehead University

Graduated: December 2025

GPA: 3.4/4.0

Relevant Coursework: C, C++, Java, Object Oriented Programming, Database Management, Data Structures, Cloud Computing, Operating System, Big Data, Algorithm Design and Analysis, Computer Architecture & Networking, Web Health Informatics

Technical Skills

Languages	: Java, Python, C#, C++, JavaScript, SQL, HTML, CSS
Frameworks	: Spring Boot, Node.js, Express.js, React, REST APIs, GraphQL
Databases	: MySQL, PostgreSQL, MSSQL, MongoDB, DynamoDB
Cloud & DevOps	: AWS, Docker, Kubernetes, Jenkins, CI/CD, Git, GitHub
Tools	: Grafana, ELK Stack, OpenTelemetry, Unit & Integration Testing
Machine Learning	: PyTorch, Keras, Pandas, Scikit-learn, LLM, Prompt Engineering
Practices	: Troubleshooting, System Design, System Debugging, Event-Driven Architecture, Agile, Network Protocols

Technical Experience

NewsBlog Web Application | Node.js, HTML, CSS, JavaScript, GNews API - [\[GitHub Link\]](#) – [\[Live Demo\]](#)

- Engineered a lightweight Node.js REST API server, reducing memory consumption by 15% by eliminating unnecessary frameworks and optimizing request handling.
- Designed a responsive user interface achieving 95+ Lighthouse performance scores, demonstrating strong attention to detail across mobile and desktop environments.
- Improved code reliability by maintaining structured Git workflows and performing systematic debugging, reducing bug resolution time by 20%.

Classroom Management System | Java, Spring Boot, Microsoft SQL, HTML5/CSS - [\[GitHub Link\]](#)

- Architected scalable RESTful APIs using Spring Boot, reducing system latency for administrative operations by 30%.
- Optimized complex SQL queries and indexing, improving report generation speed by 25% while strengthening data security with role-based access control.
- Coordinated development using Agile practices and Git version control, ensuring efficient collaboration and timely delivery of system features.

Customer Segmentation Analysis | Python, Scikit-learn, Pandas, KMeans, DBSCAN, PCA – [\[GitHub Link\]](#)

- Designed an unsupervised machine learning pipeline using KMeans and DBSCAN to classify customer purchasing patterns, improving clustering quality by 25%.
- Leveraged Principal Component Analysis (PCA) to reduce dataset dimensionality from 15+ variables to three components, improving visualization clarity and computational efficiency.
- Conducted extensive data preprocessing and exploratory analysis, identifying behavioral patterns that supported data-driven decision making.

Portfolio Page | Node.js HTML, CSS, JavaScript – [\[GitHub Link\]](#) – [\[Live Demo\]](#)

- Created a personal portfolio website with Node.js backend and responsive front-end design to showcase projects and technical skills.

PROFESSIONAL EXPERIENCE

Crew Member — McDonald's | October 2022 – June 2025

- Maintained operational efficiency in a fast-paced environment while managing multiple responsibilities simultaneously.
- Demonstrated strong time management and attention to detail by ensuring order accuracy and smooth service during peak hours.
- Collaborated with team members to resolve service issues quickly, strengthening communication and problem-solving skills.
