Summary

Computer Science graduate with hands-on experience building full-stack applications. Experienced in developing responsive web interfaces, RESTful APIs, secure authentication, automated testing, and cloud-based solutions across the Software Development Life Cycle. Skilled in building containerized and microservices-based applications using Docker and Kubernetes, while leveraging AI-powered development tools to accelerate coding, debugging, testing, and feature delivery. Strong foundation in software engineering principles, object-oriented programming, and scalable application development.

Skills

- **Programming Languages:** Java, Python, C++, JavaScript (ES6+), SQL, HTML, CSS
- **Frontend:** HTML5, CSS3, React
- **Backend:** Node.js, Express.js, Flask, REST APIs, Microservices, Unit & Integration Testing
- **Databases:** MySQL, PostgreSQL, MongoDB, NoSQL
- **Tools & Practices:** Git, Agile/Scrum, SDLC, CI/CD concepts, Debugging, Kubernetes, RabbitMQ, Docker, AI-Assisted Development Workflows (Claude), Jira, Figma
- **Concepts:** OOP, Design Patterns, Network Protocols, Event-Driven Architecture, Code Reviews, Performance Optimization

Experience

Web Development Volunteer | U+ Education

March 2026 – Present

- Designed and developed the About Page for a new educational web platform using Figma, React, JavaScript, and CSS, delivering a responsive and user-friendly interface
- Translated Figma designs into reusable React components, ensuring consistent styling, responsiveness, and maintainable code
- Developed Math Quest, an interactive educational mini game for the platform using React, JavaScript, and CSS, implementing dynamic gameplay logic and engaging user interactions
- Collaborated with cross-functional team members using Git/GitHub for version control and Jira for task management, contributing to the ongoing development and enhancement of the platform

Projects

BeFit – AI-Powered Fitness Application | React, Node.js, Express, Python, Claude AI, REST APIs

[\[GitHub\]](#) [\[APP\]](#)

- Developed a full-stack fitness web application with React frontend and Node.js/Express backend supporting authentication and user data management
- Implemented secure authentication using JWT and bcrypt for encrypted user signup/login workflows
- Designed backend data layer using structured JSON (demo mode) simulating database operations for Render deployment
- Leveraged Claude AI as an AI-assisted development tool for code generation, debugging, refactoring, and accelerating feature implementation

CardioCheck – Heart Risk Prediction System | Python, Scikit-learn, Flask, JavaScript, HTML, CSS

[\[GitHub\]](#) [\[APP\]](#)

- Built an end-to-end full-stack machine learning web application with Flask backend and interactive frontend UI
- Developed REST APIs for real-time ML inference and frontend integration
- Used Claude AI extensively to accelerate development, troubleshoot backend logic, optimize test creation
- Wrote 46 automated tests (unit, integration, smoke) using pytest achieving 100% pass rate

Microservices Video Processing System | Python, FastAPI, Docker, Kubernetes, RabbitMQ, MongoDB

[\[GitHub\]](#)

- Designed and deployed a containerized microservices system using FastAPI and Docker, orchestrated with Kubernetes for scalable, fault-tolerant video processing
- Implemented asynchronous task pipelines using RabbitMQ, enabling parallel processing and improving system throughput
- Developed modular APIs with Git-based workflows and containerized build processes, improving build reproducibility and aligning with CI/CD practices

Education

Honours Bachelor of Science in Computer Science

University: Lakehead University | **Graduated:** February 2026

Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Big Data, Cloud Computing, Operating Systems, Software Engineering, Web Health Informatics, Computer Networking, Computer Architecture
