Summary

Computer Science graduate from Lakehead University with experience building full-stack applications using Java, Spring Boot, React, and Node.js. Skilled in developing RESTful APIs, microservices, and scalable cloud-based systems using AWS, Azure, and GCP. Experienced with Docker, Kubernetes, and modern DevOps practices through academic projects involving secure role-based systems, real-time data integration, and machine learning. Seeking to contribute strong backend and full-stack engineering skills in an Agile software development team.

Education

Honours Bachelor of Science in **Computer Science** – Lakehead University

Graduated: December 2025

GPA: 3.4/4.0

Relevant Course: C, C++, Java, Object Oriented Programming, Database Management, Data Structures, Cloud Computing, Operating System, Big Data, Algorithm Design and Analysis, Computer Architecture & Networking, Web Health Informatics

Technical Skills

Languages: Java, Python, C++, JavaScript, HTML5, CSS3, SQL

Frameworks & Libraries: React, Spring Boot, Node.js, Express.js, REST APIs, Microservices, JWT Authentication, WebSockets

Databases & Data Modeling: MySQL, MSSQL, PostgreSQL, MongoDB, DynamoDB, GraphQL

Cloud & DevOps: AWS, Azure, GCP, Jenkins, Kubernetes, Docker, CI/CD, Git

Machine Learning & Data Science: Scikit-learn, Pandas, NumPy, KMeans, DBSCAN, PCA, Predictive Modeling, Data Preprocessing

Software Practices & Tools: GitHub, Troubleshooting, Monitoring, Unit Testing, VS Code, Linux CLI, Agile, Microsoft Office
Problem Solving, System Design, Code Optimization

Academic Experience

NewsBlog Web Application (**Node.js, HTML, CSS, JavaScript, GNews API**) - [\[GitHub Link\]](#) - [\[Live Demo\]](#)

- Developed a **full-stack news web app** fetching real-time headlines with **GNews API**.
- Built a custom **Node.js** server for routing, API integration, and dynamic content rendering without Express.js.
- Implemented category-based filtering and a **responsive frontend** with clean layout and hover effects.
- Managed **Git/GitHub** version control while applying debugging and testing best practices.

Classroom Management System (**Java, Spring Boot, Microsoft SQL, HTML5/CSS**) - [\[GitHub Link\]](#)

- Built a **modular full-stack application** streamlining administrative tasks.
- Developed **RESTful APIs** with Spring Boot, improving data retrieval efficiency and system responsiveness.
- Implemented **role-based access control** and optimized SQL queries to secure data and speed up report generation.
- Managed a **MSSQL server** and applied **Agile practices, unit testing, and Git version control** to enhance reliability and maintainability.

Blood Bridge Web Application (**Java, SQL, HTML5/CSS, Spring Boot**) – [\[GitHub Link\]](#)

Customer Segmentation Analysis (**Python, Scikit-learn, Pandas, KMeans, DBSCAN, PCA**) – [\[GitHub Link\]](#)
