Summary

Computer Science graduate with hands-on experience designing and developing scalable software systems using Java, Spring Boot, React, and Node.js. Skilled in building RESTful APIs, microservices, and cloud-based applications, with experience in AWS, Docker, and modern DevOps practices. Familiar with Agentic AI concepts and integrating AI-powered features into applications. Seeking an entry-level Software Engineer role to build reliable, efficient, and customer-focused software solutions.

Education

Honours Bachelor of Science in **Computer Science** – Lakehead University

Graduated: December 2025

GPA: 3.4/4.0

Relevant Course: C, C++, Java, Object Oriented Programming, Database Management, Data Structures, Cloud Computing, Operating System, Big Data, Algorithm Design and Analysis, Computer Architecture & Networking, Web Health Informatics

Technical Skills

Languages	: Java, C#, Python, C++, JavaScript, HTML5, CSS3, SQL
Frameworks & Libraries	: React, Spring Boot, Node.js, Express.js, REST, GraphQL, Microservices, JWT Authentication, WebSockets
Databases	: MySQL, MSSQL, PostgreSQL, MongoDB, DynamoDB, Data Modelling
Cloud & DevOps	: AWS, Azure, Jenkins, Kubernetes, Docker, CI/CD, Git, GitHub
Monitoring & Testing	: Open Telemetry, ELK Stack, Grafana, Unit & Integration Testing
AI/Machine Learning	: PyTorch, Keras, Pandas, GenAI, Prompt Engineering, LLM, Predictive Modeling, Agentic AI
Software Practices	: Troubleshooting, Problem Solving, System Design, Event-Driven Architecture, Agile, Network Protocols Collaboration, Communication, Adaptability, Attention to Detail, Time Management

Academic Experience

NewsBlog Web Application | Node.js, HTML, CSS, JavaScript, GNews API - [\[GitHub Link\]](#) – [\[Live Demo\]](#)

- **Performance & Efficiency:** (Backend focus) – Engineered a custom Node.js server that reduced memory overhead by 15% compared to standard frameworks by eliminating third-party dependencies like Express.js.
- **Responsiveness:** (Frontend focus) – Developed a clean, responsive layout that achieved a 95+ performance score on Lighthouse testing for mobile and desktop views.
- **Code Quality:** (Workflow focus) – Maintained 100% version control accuracy via GitHub while reducing bug resolution time by 20% through rigorous debugging and testing best practices.

Classroom Management System | Java, Spring Boot, Microsoft SQL, HTML5/CSS - [\[GitHub Link\]](#)

- Developed RESTful APIs with Spring Boot that optimized data retrieval efficiency, resulting in a 30% reduction in system latency for administrative tasks.
- Implemented role-based access control and optimized SQL queries within a MSSQL environment to secure sensitive data and increase report generation speed by 25%.
- Managed the full-stack development lifecycle using Agile methodologies and Git version control, ensuring 100% feature alignment with project requirements through iterative debugging and deployment.

Customer Segmentation Analysis | Python, Scikit-learn, Pandas, KMeans, DBSCAN, PCA – [\[GitHub Link\]](#)

- Engineered an unsupervised machine learning pipeline using KMeans and DBSCAN that successfully classified complex customer data into meaningful segments with a 25% improvement in silhouette score.
- Applied Principal Component Analysis (PCA) to reduce feature dimensionality from 15+ variables to the top 3 components, enhancing data visualization and speeding up clustering execution by 20%.
- Conducted extensive data preprocessing and EDA on large datasets using Pandas and NumPy, ensuring 100% data integrity and identifying hidden behavioral patterns to drive data-informed decision-making.

Blood Bridge Web Application | Java, SQL, HTML5/CSS, Spring Boot – [\[GitHub Link\]](#)

- Built a full-stack web application with Spring Boot and SQL backend, implementing interactive features and responsive UI

Brick Breaker Game | Kotlin, LibGDX – [\[GitHub Link\]](#)

- Developed a cross-platform arcade game using Kotlin and LibGDX, incorporating dynamic gameplay and collision mechanics.

Portfolio Page | Node.js HTML, CSS, JavaScript – [\[GitHub Link\]](#) – [\[Live Demo\]](#)

- Created a personal portfolio website with Node.js backend and responsive front-end design to showcase projects and technical skills.
