Objective

Computer Science graduate with hands-on experience designing and developing scalable software systems using Java, Python, and cloud technologies. Skilled in RESTful APIs, microservices, and Agile development, with a strong foundation in data structures, algorithms, and object-oriented design. Seeking an entry-level Software Engineer role to deliver clean, reliable, and customer-focused software solutions.

Education

Honours Bachelor of Science in **Computer Science** – Lakehead University

Graduated: December 2025

GPA: 3.4/4.0

Relevant Course: C, C++, Java, Object Oriented Programming, Database Management, Data Structures, Cloud Computing, Operating System, Big Data, Algorithm Design and Analysis, Computer Architecture & Networking, Web Health Informatics

Technical Skills

Languages: **Java, Python, C++, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL**

Frameworks & Libraries: **React, Spring Boot, Node.js, Express.js, REST APIs, Microservices, JWT Authentication, WebSockets**

Databases & Data Modeling: **MySQL, MSSQL, PostgreSQL, MongoDB, DynamoDB, GraphQL**

Cloud & DevOps: **AWS (S3, RDS, Lambda, EC2), Azure, GCP, Jenkins, Kubernetes, Docker, CI/CD, Git**

Machine Learning & Data Science: **Scikit-learn, Pandas, NumPy, KMeans, DBSCAN, PCA, Predictive Modeling, Data Preprocessing**

Software Practices & Tools: **GitHub, Troubleshooting, Monitoring, Unit Testing, VS Code, Linux CLI, Agile, Microsoft Office**

Projects

NewsBlog Web Application (**Node.js, HTML, CSS, JavaScript, GNews API**) - [\[GitHub Link\]](#) – [\[Live Demo\]](#)

- Developed a **full-stack news web app** fetching real-time headlines with **GNews API**.
- Built a custom **Node.js** server for routing, API integration, and dynamic content rendering without Express.js.
- Implemented category-based filtering and a **responsive frontend** with clean layout and hover effects.
- Managed **Git/GitHub** version control while applying debugging and testing best practices.

Classroom Management System (**Java, Spring Boot, Microsoft SQL, HTML5/CSS, AWS**) - [\[GitHub Link\]](#)

- Built a **modular full-stack application** streamlining administrative tasks.
- Developed **RESTful APIs** with Spring Boot, improving data retrieval efficiency and system responsiveness.
- Implemented **role-based access control** and optimized SQL queries to secure data and speed up report generation.
- Managed a **MSSQL server** and applied **Agile practices, unit testing, and Git version control** to enhance reliability and maintainability.

Other Projects

- **Blood Bridge Web Application** (Java, SQL, HTML5/CSS, Spring Boot) – [\[GitHub Link\]](#)
- **Customer Segmentation Analysis** (Python, Scikit-learn, Pandas, KMeans, DBSCAN, PCA) – [\[GitHub Link\]](#)
- **Brick Breaker Game** (Kotlin, LibGDX) – [\[GitHub Link\]](#)
