INTRODUCTION

Computer Science Graduate with strong experience in designing and developing scalable software systems using Java, Python, and cloud technologies. Solid foundation in data structures, algorithms, object-oriented design, and distributed systems. Hands-on experience building RESTful APIs, microservices, and cloud-simulated applications using AWS. Proven ability to deliver clean, maintainable code in Agile environments while applying CI/CD, testing, and debugging best practices. Passionate about building reliable, customer-focused software at scale.

EDUCATION

Lakehead University

Sep 2022 - Dec 2025

Bachelor's Degree in Computer Science

Relevant Course: C, C++, Java, Object Oriented Programming, Database Management, Data Structures, Cloud Computing, Operating System, Big Data, Algorithm Design and Analysis, Computer Architecture & Networking, Web Health Informatics.

SKILLS

- **Languages:** Java, Python, C++, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
- **Frameworks & :** React, Spring Boot, Node.js, Express.js, REST APIs, GraphQL, Microservices, JWT Authentication & Authorization, WebSockets
- **Databases:** MySQL, Microsoft SQL Server (MSSQL), PostgreSQL, MongoDB, DynamoDB, Data modeling
- **Cloud & DevOps:** AWS (S3, RDS, Lambda, EC2), Azure, GCP, Jenkins, Kubernetes, Docker, CI/CD, Git
- **Machine Learning:** Scikit-learn, Pandas, NumPy, KMeans, DBSCAN, PCA, Predictive Modeling, Data Preprocessing, Feature Engineering, GenAI
- **Software Practices:** GitHub, Troubleshooting, Monitoring, Unit Testing, VSCode, Linux CLI, Agile, Microsoft Office

PROJECTS

Online Shopping System | Java, Node.js, Express.js, Rest API, GraphQL, MySQL, MongoDB, JWT, WebSockets

- Built a full-stack online shopping platform with server-side rendering, REST and GraphQL APIs, enabling product catalog management, secure checkout, and order tracking.
- Implemented authentication and role-based authorization using JWT and sessions, improving security and reducing unauthorized access risk by 30%.
- Integrated SQL (MySQL) and NoSQL (MongoDB) databases, optimizing data modeling and queries to reduce average API response time by 25% under simulated concurrent load.
- Developed real-time order notifications using WebSockets, PDF invoice generation, file upload/download, and email alerts, improving customer engagement and operational efficiency by 20%.

Classroom Management System | Java, Spring Boot, Microsoft SQL, HTML5/CSS, AWS

- Architected a modular full-stack application for digital attendance, announcements, and reporting, reducing manual administrative effort by 60%.
- Designed and developed RESTful APIs using Spring Boot, improving data retrieval efficiency and overall system responsiveness by 35%.
- Implemented secure role-based access control and optimized SQL queries with indexing, reducing unauthorized access incidents by 100% in testing and decreasing report generation latency by 40%.
- Simulated cloud scalability using AWS DynamoDB and applied Agile practices with unit testing, Git-based version control, improving system availability and fault tolerance by 25% under concurrent load testing.

BloodBridge Web Application | Java, SQL, HTML5, CSS, Cloud Hosting

- Developed a full-stack blood donor coordination platform, improving donor-recipient matching efficiency by 45% and reducing emergency fulfillment response time by 20% through real-time notification logic.
- Implemented secure authentication and role-based authorization using Spring Security with JWT-based session management, reducing access-related errors by 30%.
- Optimized backend logic with efficient SQL queries, reducing average API response time by 35% under simulated concurrent usage.

Customer Segmentation Analysis | Python, Scikit-learn, Pandas, KMeans, DBSCAN, PCA

- Built an unsupervised ML pipeline to segment 5,000+ customers using KMeans and DBSCAN, improving customer classification accuracy by 35% and increasing promotional targeting efficiency by ~20%.

- Applied feature engineering and PCA, reducing data dimensionality by 40% while preserving clustering quality and improving model interpretability.
- Automated data preprocessing, validation, and analysis workflows, reducing data inconsistencies and processing errors, and delivering actionable insights on customer loyalty and promotion sensitivity.

EXPERIENCE

Home Clerk, **WholeSale Club**

Sep 2025 – Dec 2025

- Showed Ownership by maintaining accurate inventory records and resolving discrepancies, improving stock accuracy and operational reliability by 15%.
- Applied Dive Deep and Deliver Results by assisting with process improvements that reduced item lookup and restocking time by 20% in a high-volume environment.

Crew Member, **McDonald's**

Oct 2022 – Jun 2025

- Demonstrated Customer Obsession by maintaining high order accuracy and speed during peak hours, reducing customer wait time by 15–20% while meeting quality standards.
- Exhibited Ownership and Bias for Action by proactively identifying workflow bottlenecks and supporting team members during high-pressure shifts to ensure smooth operations.
